

Executive Programme in Management Studies

EPMS is a part-time MSc programme designed to empower our participants -your employees- with an academic mindset, equipped with the latest knowledge in the field of business and management. Our students will be prepared to face the challenges and opportunities that your organisation faces in a rapidly changing world.

Cutting-edge knowledge and expertise

- **Vertical or horizontal growth** – Our curriculum aims to deepen the knowledge of our students to become well-rounded professionals who aspire to grow their careers either upwards to higher management roles or sideways to new functions within your organisation. Successful completion of our programme will result in the accredited title of the Master of Science (MSc).
- **Different business areas** – Students have the opportunity to focus their expertise development by selecting one of the 3 tracks: Strategy, Leadership & Management or AI and Strategic Business Innovation. The track-specific courses focus on higher management issues related to these interest fields. Additionally, the programme covers essential management developments like Corporate Social Responsibility (CSR).
- **Latest development in business** – Next to the tracks, students choose from a diverse set of electives. They focus on the latest developments in business, such as Artificial Intelligence, Business Transformation and Innovation & Technology.

Practical relevance

- **Relevance to business** – Our lecturers are not only high-performing academics but also experienced business leaders and/or consultants. We invite guest speakers from reputable organisations to showcase the latest practical insights to our students.
- **Projects and thesis** – Students are challenged to solve business issues within their own companies, using the frameworks and insights gained during the programme. The final thesis allows them to work on a topic relevant

to both themselves and their organisation, guided by our professors to meet the highest academic standards.

Peer-learning

- **Teamwork** – Collaborative teamwork is emphasised, with students from various industries and roles working together in group assignments. This diverse environment ensures students to gain insights and practices beyond academic knowledge.
- **Global mindset** – The programme enhances global awareness and has an international focus. Taught in English and with students and professors from around the world.

Programme structure

- **Part-time format** – Classes will be on campus on Fridays and online. On campus classes on Friday allow students to focus on work during the week. Online classes will save time travelling to and from Amsterdam. Time that students can spend on work or study.
- **Small classes** – We keep our classes small to ensure productive discussion and interaction.

Highest academic standards

- **Triple Crown Accreditation** – The Amsterdam Business School is among the top 1% business schools worldwide with international “Triple Crown” accreditations.
- **Global rankings** – The University of Amsterdam is consistently ranked in the top 100 of the best universities in the world in both the QS ranking and the Times Higher Education World University Ranking.
